

IntelliAG A2 Air Seeder Control System

The all new IntelliAg ISO Control System from DICKEY-john offers a range of control and monitoring features displayed on a 5" colour screen:

- Up to 4 control channels for Seeding, Fertiliser & Liquid Sprayer
- Up to 160 planting rows monitored for seed and fertiliser flow rate
- Up to 5 Bin Levels monitored
- Up to 4 bins monitored for Air Pressure level
- Up to 3 RPM monitors for Fan RPM etc.
- Area planted per Bin, Product applied per Bin & Ground Speed

This new system has been designed on the ISO 11783 CAN Bus standard, which all tractor manufacturers are incorporating into their tractors.

This new technology is the future of all electronic systems used in Agriculture.
