

IntelliAG™ A2 Planter Control System

The all new IntelliAg ISO Control System from DICKY-john offers a range of control and monitoring features:

- Up to 4 control channels for Seeding & Fertiliser
- Up to 214 planting rows monitored for seed and fertiliser flow rate
- Planting Population and Seed Spacing displayed
- Bargraphs displayed for each Planting Row
- 1 monitor input for Fan RPM or Vacuum Pressure
- 1 Bin Level input
- Area planted, Product applied & Ground Speed
- Liquid Sprayer Control

This new system has been designed on the ISO 11783 CAN Bus standard, which all tractor manufacturers are incorporating into their tractors.

This new technology is the future of all electronic systems used in Agriculture.
