

ISO6 Intelliag System

The ISO6 Intelliag system is the latest 8-channel control system from Dickey-john. Based on the ISO-11783 standard, the system is plug & play through any compatible terminal, allowing use of documentation, section control, prescription maps & boundary shutoff. Various unlocks give the user features like virtual section switches & singulation; all through the base module.

IS06 PLANTER CONTROLLER

- 2, 4, 6 or 8 channels of granular or liquid rate control (or monitoring).
- PWM & servo actuator control.
- Automated valve calibrations: 1-button press.
- Up to 16 stored materials for easy changeover between products.
- Display population, seed spacing, & seeds/metre (average & highest/lowest rows) when planter sensors installed. Also see relative population between rows with bargraphs.
- Unlocks allow singulation data & bargraphs to be displayed (16 rows max for primary module, extra module for further rows). Customisable singulation bargraphs to suit any situation.
- Customisable work screens (up to 4 screens) allow the user to see the information most important to them.

WE THINK AHEAD, WE DESIGN TO LAST
