

HYDRAULIC PLANTER RATE DRIVE KIT - PDCBKT-KIT

PWM Hydraulic
Control Valve

Application Rate
Sensor

Hydraulic
Motor

Planter Drive
Shaft Coupling

- Replaces the existing Ground Drive Gearbox.
- Interfaces with your controller to allow you to plant at the exact planting population you require, without the need to change gears.
- Mud build-up on your tyres will not affect planting rates.
- Requires less maintenance than a mechanical ground drive system.

PARTS EXPLOSION
